Social Media

User Engagement a Positive as Digital Ad Spending Slowed

Earnings reports from major social media platforms highlighted that no company is immune to the slowdown in digital advertising spend amid recessionary concerns. Alphabet Inc. reported that YouTube ad revenue slid roughly 2% year-over-year (YoY) to \$7.07 billion in Q3 2022.¹ For Google, verticals such as insurance, loans, and mortgages pulled back significantly.² However, travel and retail were positives for Google Services revenue.³ Snapchat stated that marketing budgets for their ad partners are lower due to operating headwinds, inflationary pressures, and rising cost of capital. Meta's ad revenue decreased 4% YoY to \$27.2 billion.⁴

On the positive side, user engagement continued to grow. Snapchat's daily active users (DAU) beat projections by increasing 19% to 363 million in Q3.⁵ Facebook's monthly active users (MAUs) totaled 2.96 billion as of Q3, up 2% YoY.⁶ Also, 3.71 billion users logged in to at least one of Meta's apps (Facebook, Instagram, WhatsApp, or Messenger), a 4% YoY increase.⁷

Cloud Computing

Cloud Growth Persisted at a Moderated Pace

A year ago, each of the top three Hyperscalers reported revenue growth of over 40%, but growth slowed in Q3 2022. Amazon Web Services' revenue grew 27% YoY and Microsoft Azure's 35% YoY.^{8,9} For Azure, consumption revenue growth continued to moderate, and higher energy costs hurt its gross margin. Google Cloud's revenue increased 38% YoY.¹⁰ The \$600 million increase since Q2 was the same as Azure's – indicating that Google Cloud is aggressively adding share against its other two bigger rivals.¹¹ Despite what moderating industry growth in Q3 suggests, we expect businesses to continue to invest in critical long-term projects such as infrastructure tools, monitoring systems, software defined networking, and security software.

E-commerce

Digital Sales Ring in a Hopeful Holiday Outlook

The fate of e-commerce this holiday season remains impacted by inflationary concerns. According to one estimate, U.S. consumers' digital spending is expected to grow a modest 6.1% YoY in November and December, but still higher than total retail sales at 4% YoY.¹² Key online retailers' Q3 earnings provided hope for the e-commerce outlook. Amazon saw profitability rise after two consecutive quarters of losses. The nation's largest retailer reported total sales of \$127.1 billion in Q3, a 15% YoY jump from \$110.8

billion.¹³ Amazon's e-commerce sales jumped 13% YoY to \$53.4 billion.¹⁴ Etsy's shares soared after a revenue beat and encouraging guidance for Q4. In Q3, Etsy's revenue grew 11.7% YoY, some of which is attributed to Etsy's transaction fee hike.¹⁵ Also, eBay reported earnings exceeding expectations, helped by gross merchandise volume (GMV) growth in non-new (used and refurbished) in-season goods.

Lithium & Electric Vehicles (EV)

Sustainable Vehicle Market Undeterred by Economic Crises

Lithium producers and EV manufacturers continued to find a sweet spot amid rising demand for electrified transport. On the lithium side, Albemarle reported a revenue surge of 152% YoY to \$2.1 billion and reaffirmed guidance suggesting full-year earnings before interest, taxes, depreciation and amortization (EBITDA) growth of 500–550% for its lithium division.¹⁶ Albemarle said rising lithium prices could provide upside for Q4, though lower volume growth due to supply chain concerns could weigh on results. Livent reported revenue growth of 124% to \$231.6 million.¹⁷ Among EV manufacturers, Stellantis reported net revenues of 42.1 billion euros, up 29% YoY.¹⁸ The company attributed this growth to higher volumes, strong net pricing, and favorable foreign exchange translation effects. Global battery EV sales for Stellantis increased 41% YoY.¹⁹

Genomics

BioMarin Zeros in on Hemophilia Gene Therapy

The U.S. Food and Drug Administration (FDA) plans to review Roctavian, Biomarin's late-stage gene therapy for hemophilia. The company resubmitted Roctavian for approval in September. The timeline is somewhat uncertain, but BioMarin expects a decision by the end of March 2023. Roctavian is designed to treat hemophilia type A, the disease's most common form. The treatment involves using a specified virus to deliver a modified copy of the gene, which creates a blood-clotting protein that patients suffering from the disease lack. Despite presenting positive results from late-stage trials, the FDA required further monitoring for at least two years. Biomarin remains hopeful that it will receive approval, given continued positive results from patients. Earlier this year, Roctavian was approved in Europe as the first hemophilia type A gene therapy.

Pacific Bioscience Upgrades DNA Sequencing

Pacific Bioscience is ramping up production of DNA sequences with its first short-read device and upgrading its preexisting long-read hardware. The upgrade, named the Revio system, will be capable of sifting through long strings of genetic code with capacity for more than three human genomes per day at a cost of less than \$1,000 per piece.²⁰ Revio will help with cancer and agricultural genomics research and development (R&D). It will be PacBio's first sequencer using Nvidia GPUs to bring a 20-fold increase to computing power.²¹

Internet of Things

U.S. Semiconductor Sanctions on China Escalates Trade Tensions

In October, the Biden Administration implemented what is considered to be the most significant sanction on technology exports to China in decades. By imposing a limit on sales of advanced semiconductor chips, the administration wants to cut off critical technology to contain China's technology and military ambitions. Under the rules, U.S. companies must obtain a license to sell equipment to Chinese chipmakers that intend to produce advanced chips. China is a primary consumer of semiconductors, yet only produces about 15%

of the global output.²² Thus far, the restrictions have been manageable for chipmakers such as Nvidia, Intel, and Taiwan Semiconductor Manufacturing Company.

THE NUMBERS

The following charts examine returns and sales growth expectations by theme, based on their corresponding ETFs.

THEMATIC EXPECTED SALES GROWTH

Source: Bloomberg, October 31, 2022, Global X ETFs.

Note: Forward looking based on data and analysis from 10/31/2022.
1 year annualized forward sales growth is the consensus analyst expectations for total sales growth in the next 12 months.

Note: The performance data quoted represents past performance and does not guarantee future results.
*Blockchain reflects figures according to BKCH ETF

Performance data quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investors' shares, when sold or redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance quoted. High short-term performance of the fund is unusual and investors should not expect such performance to be repeated. For performance data current to the most recent month end, please call 1-888-493-8631 or visit www.globalxetfs.com.

Note: F12 Sales Growth refers to the consensus analyst expectations for total sales growth in the next 12 months.

PSG and EVSG refer to Price-to-Sales over F12 Sales Growth and Enterprise Value over F12 Sales Growth, respectively.

N/As reflect a negative growth number in the denominator and similar to traditional PEG ratios aren't typically displayed as such (hence the N/A).

INTRO TO THEMATIC INVESTING COURSE – ELIGIBLE FOR CE CREDIT

Global X has developed an interactive, self-guided [Intro to Thematic Investing course](#), that is designed to share the latest ideas and best practices for incorporating thematic investing into a portfolio.

This program has been accepted for 1.0 hour of CE credit towards the CFP®, CIMA®, CIMC®, CPWA® or RMA certifications. To receive credit, course takers must submit accurate and complete information on the requested forms, complete the entire course, and receive a 70% or higher on the Intro to Thematic Investing Quiz.

For Canadian course takers: This program has been reviewed by FP Canada and qualifies for 1 FP Canada-Approved CE Credit, in the category of Product Knowledge, towards the CFP® certification or QAFP™ certification. To receive credit, course takers must submit accurate and complete information (including Job Title) on the requested forms, complete the entire course, and receive a 70% or higher on the Intro to Thematic Investing Quiz.

Questions on receiving CE credit may be sent to: Education@globalxetfs.com

Investing involves risk, including the possible loss of principal. International investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles or from economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume. Narrowly focused investments may be subject to higher volatility. The funds are non-diversified.

The companies in which the Funds invest may be subject to rapid changes in technology, intense competition, rapid obsolescence of products and services, loss of intellectual property protections, evolving industry standards and frequent new product productions, and changes in business cycles and government regulation. There are additional risks associated with investing in mining industries.

SOCL invests in securities of companies engaged in the social media industry. The risks related to investing in such companies include disruption in service caused by hardware or software failure, interruptions or delays in service by third-parties, security breaches involving certain private, sensitive, proprietary and confidential information managed and transmitted by social media companies, and privacy concerns and laws, evolving Internet regulation and other foreign or domestic regulations that may limit or otherwise affect the operations of such companies. The business models employed by the companies in the social media industry may not prove to be successful.

Companies within Genomics, Healthcare and Biotechnology sectors can be affected by government regulations, rapid product obsolescence, intense industry competition and loss or impairment of patents or intellectual property rights.

Carefully consider the Funds' investment objectives, risk factors, charges, and expenses before investing. This and additional information can be found in the Funds' summary or full prospectus, which may be obtained by calling 1.888.493.8631, or by visiting globalxetfs.com. Please read the prospectus carefully before investing.

Global X Management Company LLC serves as an advisor to Funds. The Funds are distributed by SEI Investments Distribution Co. (SIDCO), which is not affiliated with Global X Management Company LLC or Mirae Asset Global Investments.

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will reduce returns. Beginning October 15, 2020, market price returns are based on the official closing price of an ETF share or, if the official closing price isn't available, the midpoint between the national best bid and national best offer ("NBBO") as of the time the ETF calculates current NAV per share. Prior to October 15, 2020, market price returns were based on the midpoint between the Bid and Ask price. NAVs are calculated using prices as of 4:00 PM Eastern Time. The returns shown do not represent the returns you would receive if you traded shares at other times.

Indices are unmanaged and do not include the effect of fees, expenses or sales charges. One cannot invest directly in an index. This information is not intended to be individual or personalized investment or tax advice and should not be used for trading purposes. Please consult a financial advisor or tax professional for more information regarding your investment and/or tax situation.
